

# MyTea

by Cora Jacobson

MyTea provides the tea enthusiast with everything needed to log and use a tea collection - users can input their teas, sort them to find today's perfect cup, and customize the timers to help track infusions for each tea in their collection.

Tea

identifier: UUID  
teaName: String  
source: String  
year: Int16  
teaType: String (TeaType.rawValue)  
teaFormat: String (TeaFormat.rawValue)  
status: String (Status.rawValue)  
favorite: Bool

Note

text: String  
timestamp: Date

Image

image: Data
